### Collaborating without git

#### You've got email:

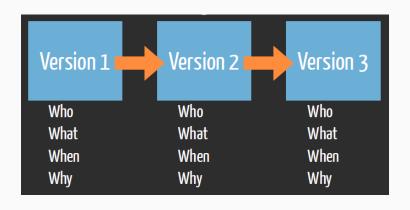

I'm attaching the final dataset to this email. Hope the analysis goes well!

#### Later:

We just found a mistake in the data so I'm attaching the revised final dataset. Sorry about that!

# Version control with git

### Version control with git

R. Fitzjohn (https://github.com/richfitz/reproducibility-2014)

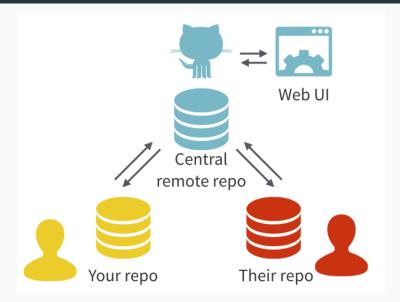

· Who did what, when, and why

- · Who did what, when, and why
- Record all changes

- Who did what, when, and why
- Record all changes
- Can go back (undo)

- · Who did what, when, and why
- Record all changes
- Can go back (undo)
- Easy collaboration (GitHub, GitLab...)

#### Distributed version control

Project backup (including history)

- Project backup (including history)
- Easy collaboration (social coding)

- Project backup (including history)
- · Easy collaboration (social coding)
- Project management (issues, task planning...)

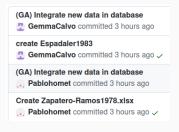

- Project backup (including history)
- · Easy collaboration (social coding)
- · Project management (issues, task planning...)
- · Easy web deployment

- Project backup (including history)
- Easy collaboration (social coding)
- Project management (issues, task planning...)
- Easy web deployment
- Continuous integration (GitHub Actions)

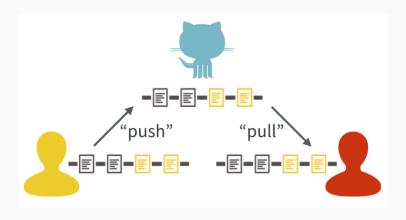

### Automatic data checks, integration & website

### Automatic data checks, integration & website

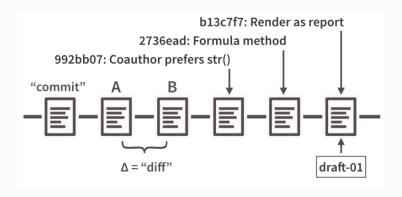

#### Distributed version control

J. Bryan: Excuse me, do you have a moment to talk about version control?

### Commits save snapshots of project

J. Bryan: Excuse me, do you have a moment to talk about version control?

#### Collaboration workflow

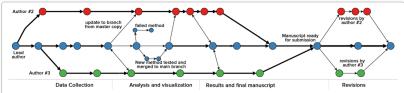

Figure 3 A hypothetical Git workflow for a scientific collaboration involving three authors. Each circle represents a commit and colors denote author specific commits. Two way arrows indicate a sync (a push and pull in Git terminology). One way arrows indicate an update to one branch from another. Horizontal arrows indicate development along a particular branch.

#### Ram 2013

# Set up

### Set up

```
https://happygitwithr.com/
https://git-scm.com/
https://github.com/
```

### Sign up on GitHub

```
https://github.com/
```

Advice: https://happygitwithr.com/github-acct.html

#### Install R

https://cran.r-project.org/

#### Install RStudio

https://www.rstudio.com/products/rstudio/download/
#download

### Install git

https://happygitwithr.com/install-git.html

### Introduce yourself to git

Use same email as GitHub!

#### Create and save Personal Access Token (PAT)

```
usethis::create_github_token()
```

Will open GitHub webpage

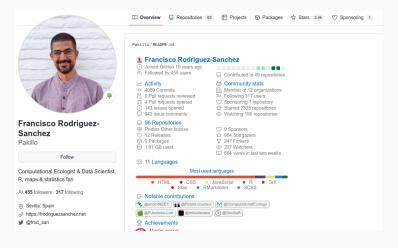

Click 'Generate token' (green button)

Paste and store you PAT:

```
gitcreds::gitcreds_set()
```
